# Experimental Task 3:MIDI Input Control

## Steps:

- Connect a MIDI keyboard (or enable Virtual Piano inside LMMS).
- Load your oscillator plugin again.
- In LMMS, go to Settings → MIDI and select your MIDI device.
- Assign the MIDI input to the oscillator plugin.
- Press keys on the MIDI keyboard → plugin generates real-time sound.
- Adjust velocity sensitivity to control loudness.
- Try different octaves to explore pitch range.
